

Flash talks on their research

Wednesday, 15 July 2026 14:05 (36 minutes)

In this sub-session, we will have flash talks on their own topics by young researchers. If you want to discuss with them, please feel free to contact them during the coffee break!

Nanaki Itakura (M1): WaCoT & NGC1068 review

Kai Morita (M2): VHE Gamma-Ray Observations of the PeVatron Candidate V4641 Sgr with LST-1

Sogo Ito (M2): Systematic Uncertainties in Flux Estimation for Large-Zenith-Angle Observations with LST-1

Habib Mondal (postdoc): Pushing the Horizon: Flat Spectrum Radio Quasars with LST-1

Zhipeng Zhang (postdoc): From LACT to LST

Mitsunari Takahashi (project assistant professor): How should we record research with self-made software?

Presenters: MONDAL, Habib Ahammad; MORITA, Kai; TAKAHASHI, Mitsunari; IWAKURA, Nanaki; ITO, Sogo (Nagoya University); ZHANG, ZHIPENG

Session Classification: Session 3
