

Neutrino Physics with Super-Kamiokande and Hyper-Kamiokande: Recent Progress and Future Prospects

Wednesday, 15 July 2026 14:50 (23 minutes)

This talk will review recent progress in Super-Kamiokande neutrino research, including oscillation measurements, low-energy neutrino studies and supernova neutrino searches. It will also discuss the current status of Hyper-Kamiokande and its physics goals in neutrino related field.

Presenter: WANG, Xubin

Session Classification: Session 4
