

Recent results from the Tibet AS γ experiment

Monday, 26 October 2015 17:50 (20 minutes)

Recent results from the Tibet AS γ experiment will be reported. The presentation will be focused mainly on the high-energy cosmic-ray anisotropy and the research on the Sun's magnetic field by means of the Sun's shadow observed by the Tibet air shower array.

Primary author: Dr SAKO, Takashi (Institute for Cosmic Ray Research, University of Tokyo)

Co-author: COLLABORATION, The Tibet AS γ (The Tibet AS γ Experiment)

Presenter: Dr SAKO, Takashi (Institute for Cosmic Ray Research, University of Tokyo)

Session Classification: Cosmic Rays

Track Classification: Ultra High Energy Cosmic Rays
