

GWADW2022 - Approaching the low-frequency design sensitivity of ground-based detectors

Contribution ID: 46

Type: **Poster presentation**

Space GW Antenna B-DECIGO

Tuesday, 24 May 2022 13:30 (2 hours)

B-DECIGO is a space gravitational wave antenna mission. While it is a precursor mission of DECIGO, we can expect fruitful sciences with B-DECIGO. One of the most exciting science cases is detection of compact binary system before merger. It will enlarge the possibility of multi-messenger astronomy with electro-magnetic wave observations at the time of merger. In this presentation, we will review the science cases and mission concept of B-DECIGO.

Primary authors: Prof. ANDO, Masaki (University of Tokyo); DECIGO GROUP

Session Classification: Poster session I

Track Classification: Science cases related to GW at low frequencies
