- No evidence of NLDBD
- Half-life(90% C.L.): 2.1×10^{23} yr
- $M_{\beta\beta}$: (1.4 – 3.7) eV
- First NLDBD result from dual-phase liquid xenon detector
- Demonstrate multi-physics reach of xenon dark-matter detector

Result will come out soon!

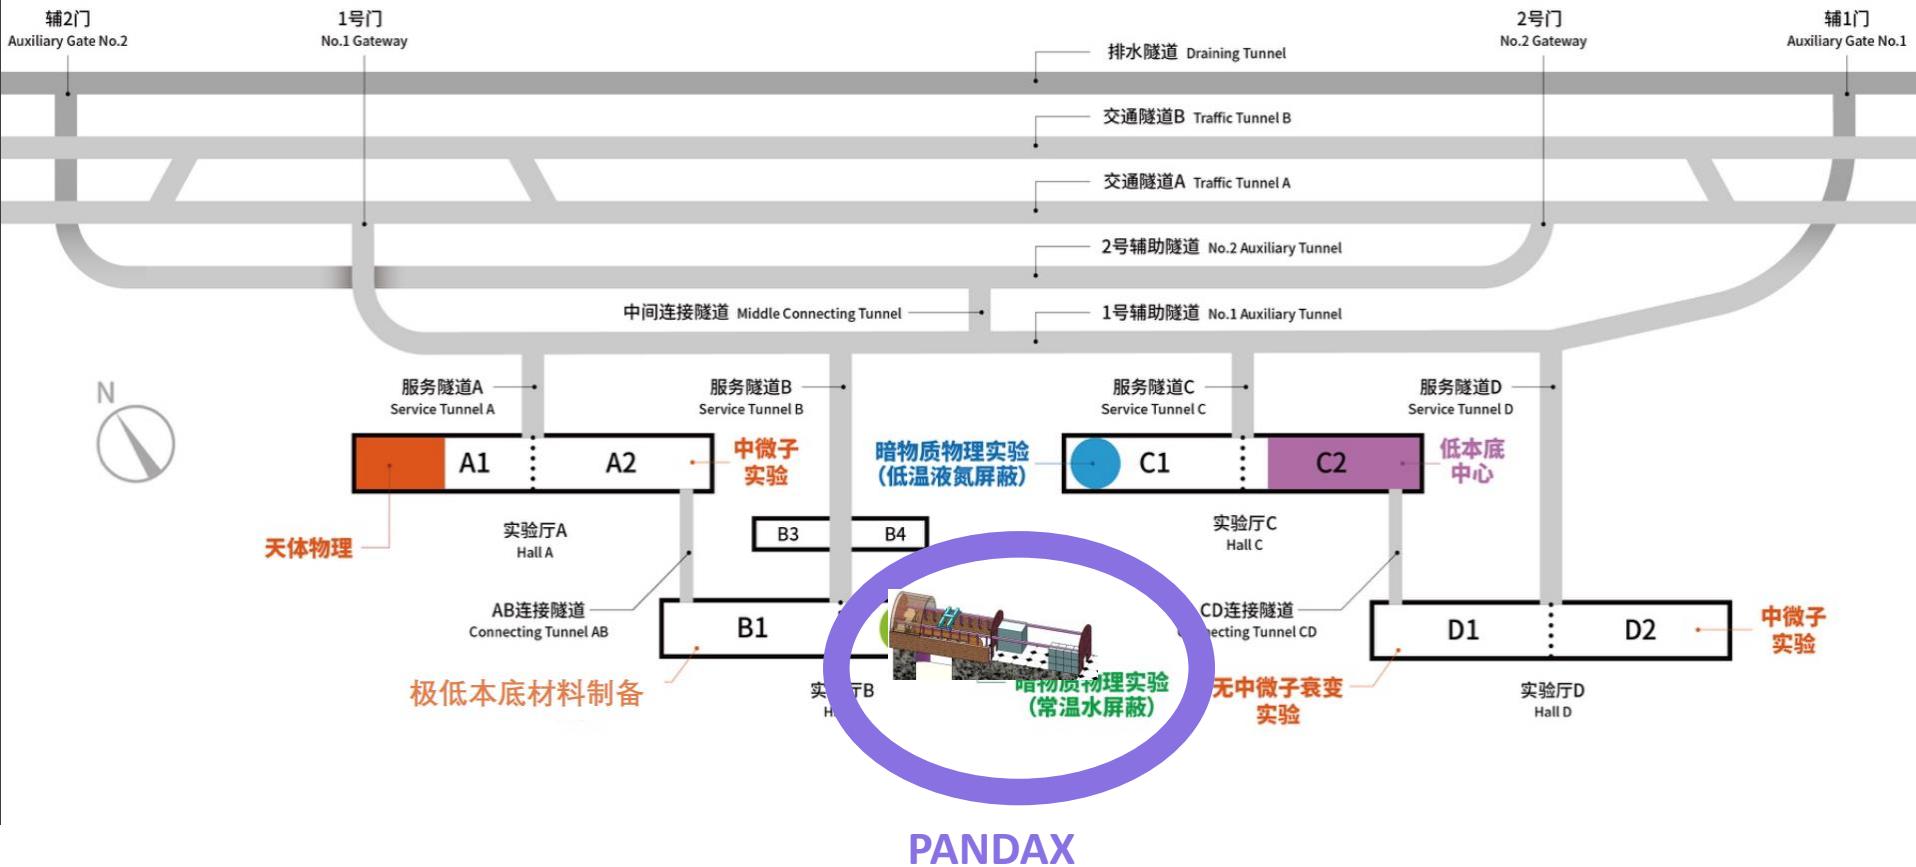

PandaX-4T Sensitivity

- A multi-ton upgradable liquid xenon experiment with an eventual goal of the neutrino floor
- Intermediate next stage:
 - PandaX-4T (4-ton target) with SI sensitivity $\sim 10^{-47} \text{ cm}^2$
 - x10 more sensitive than PandaX-II
